

Optical Distribution Frame

2LINE ODF 180

The 2LINE ODF is an all-in-one high density and easy-to-use patch cable management solution for passive fibre optic networks.

The cost- and space-saving distribution system has a capacity of up to 2,379 ports at 33U. Due to its modularity, it can be set up in a short time, as well as mirror-inverted for short patch paths. Completely pre-assembled cabinets according to customer requirements ensure considerable time savings on site.

Technical data

Dimensions HxWxD [mm]	1800x900x300
Weight	ca. 57kg without modules
Material	Stainless steel, galvanised and powder-coated steel, plastic
Colour	RAL 7035

Areas of application

- Data centres
- Operating centres (Central Office)
- Point of Presence

Advantages

Pre-assembled and ready for connection according to customer requirements

Uniform patch cable length in the rack with the 2LINE Patch+ Matrix

Versatile use due to lightweight modular construction

Scope of delivery

- 1 pc. 2LINE ODF 180
- 1 pc. Assembly instruction

Optional accessories

- 2LINE ODF door set, 2-piece with 3-point rod locking system, swivelling lever prepared for profile half cylinder
- 2LINE ODF side panel
- 2LINE Cable duct system at the top and bottom
- 2LINE Cover KAP (bundle loader protection)
- 2LINE Cover plate roof
- 2LINE Splitter holder and splitters
- 2LINE Splice/Patch Modules
- 2LINE Central support element
- 2LINE Bracket clamps
